

**Tips and Hints #3**  
**December 23, 2009**

## **Is Your Company Listed for Local Search Results?**

Check to see if your company site is listed for local search results through Google, Yahoo and Bing (Microsoft) search engines.

Go to <http://getlisted.org/> enter your business name and zip code. Press <Check My Listing> and look for your results.

If you need to add a listing or edit one, you will need a few things so I suggest you contact me for some recommendations...such as logos, photos, history, description, contact information, office/store hours, etc.

You can even list if you work from home or have a mailbox drop. It might take a while if you do not have a telephone listed in a business name. Some sites may send a written snail mail confirmation.
